DiaSpect Tm US distribution agreement with McKesson

EKF Diagnostics Holdings plc (AIM: EKF), the AIM listed point-of-care business, announces that it has signed a private label distribution agreement with McKesson Medical-Surgical Inc., an affiliate of McKesson Corporation - the Fortune Global 500 healthcare distribution specialist and one of the largest companies in the US by revenue - for the Company's hand-held reagent-free hemoglobin analyzer, the DiaSpect Tm.

The DiaSpect Tm is the world's fastest hemoglobin analyzer and will be branded in the US by McKesson under its own branded line, as the McKesson Consult® Hb analyzer.

The agreement follows US Food and Drug Administration 510(k) clearance and CLIA waiver by statute for the DiaSpect Tm in April 2018, approving the product for use in point of care and Certificate of Waiver settings. Sales of the McKesson Consult® Hb analyzer are expected following full launch in the autumn, 2018.

For more information on the DiaSpect Tm see:
www.ekfdiagnostics.com/diaspect.html

Commenting, Julian Baines, CEO of EKF, said:

"As I said in April the US market is a key target for the DiaSpect Tm, which gives physicians access to an easy to use, accurate and portable hemoglobin measurement system able to deliver laboratory quality results at the point of care within seconds."

"This agreement with McKesson allows us to offer this innovative technology to physicians and childcare specialists across the US through the market's leading and most established healthcare distribution player. We expect that this partnership will ultimately deliver significant value to shareholders."
